

## Safety Precautions

Keep out of reach of children.

Close the cap tightly when the bottle is full.

Do not fill the bottle above the fill-up limit point shown below.

Do not put dry ice or carbonated beverages in the bottle.

Do not place the bottle near stoves, open flames, or other sources of extreme heat.

Do not use the bottle for any purposes other than keeping beverages warm or cold.

Do not heat the bottle in a microwave oven.

Do not disassemble or attempt to repair the bottle by yourself.

## For Best Results

The following may cause the quality of the product to deteriorate.

- Storing milk, dairy products, or certain fruit juices in the bottle.
- Storing soups or beverages containing salt in the bottle.
- Using chlorine-based bleaches when cleaning the bottle.

The following may cause spills, diminish the bottle's ability to maintain beverage temperatures, or otherwise damage the product.

- Knocking over, dropping, or exposing the bottle to excessive shocks.
- Removing the protective sheet on the underside of the bottle.
- Placing the bottle on its side.

To keep your beverage warm or cool longer.

1. Pour hot (or cold) water into the bottle, and let it sit for one or two minutes to allow the inside of the bottle to preheat (or precool).
2. Pour out the preheat (or pre-cool) water from step 1, and pour your beverage into the bottle.

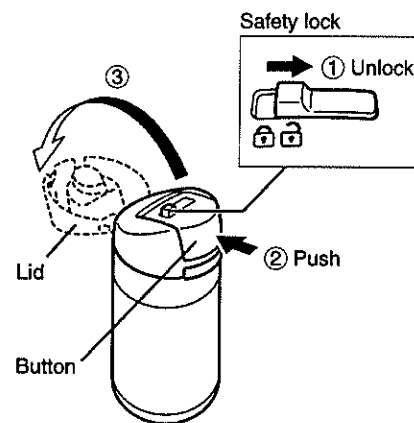

The bottle rattles when shaken.

This is caused by a copper sheet moving inside the bottle and it doesn't affect the performance of the bottle. The copper sheet is used for boosting the performance of heat retention.

## How to Clean

### Opening/Closing the Lid

To drink, switch the safety lock to the  (unlock) position, and press the button.

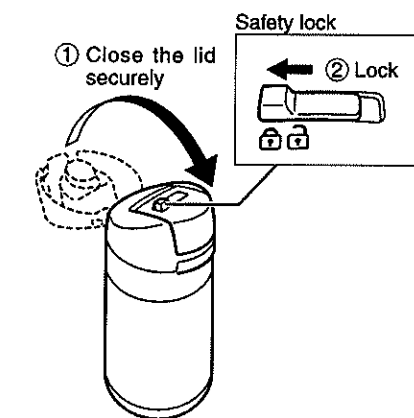

- ◆ Clean after every use.
- ◆ Use synthetic kitchen detergent (for plates and cooking utensils).
- ◆ Use a sponge or soft cloth.
- ◆ Clean the cap and gasket thoroughly to prevent odors.

### Caution

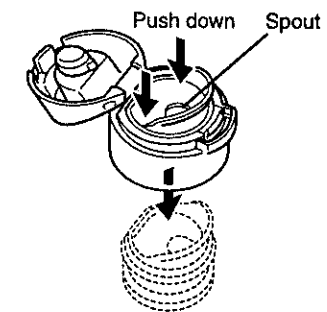

- Wipe the bottle with a dry cloth immediately after washing.
- Do not use dishwashers / dishdryers or boiling water.
- Always attach the spout and gaskets (large, medium, small) properly. → See next section

When not in use, hold the mug upright, close the lid, and switch the safety lock to the  (lock) position.

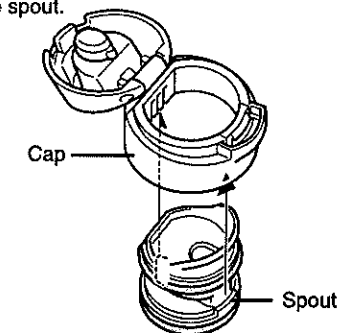

### Attaching and Removing the spout

#### To Remove

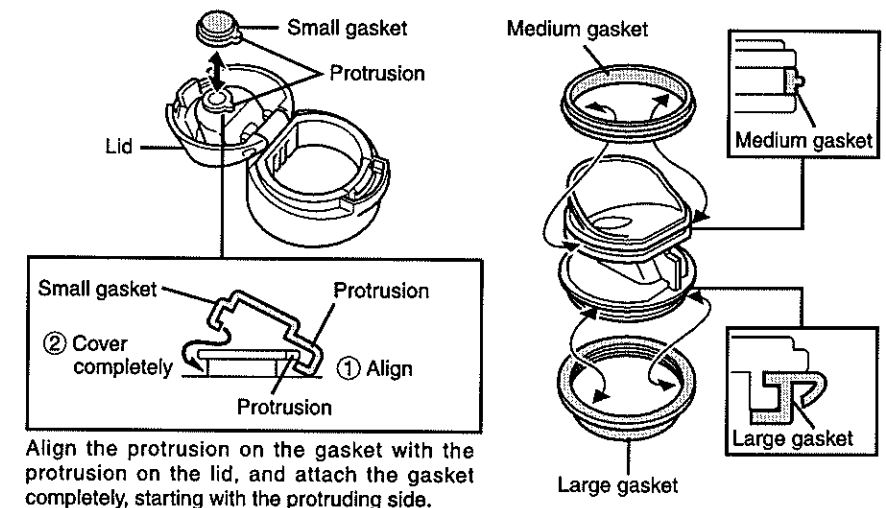

#### To Attach

Be sure that the cap is attached securely to the spout.

### Attaching and Removing the gasket

Be careful not to attach the gaskets in the wrong place or direction, and be sure to attach them fully and securely.

Align the protrusion on the gasket with the protrusion on the lid, and attach the gasket completely, starting with the protruding side.

## Specifications

### Materials

Inner flask	Stainless steel
Outer container	Stainless steel (with acrylic coating)
Mouth (opening)	Stainless steel
Cap / Spout	Polypropylene
Gasket	Silicon

### Temperature retention

MMQ-A035	Greater than 83°C / 181°F (1hour)
	Greater than 61°C / 142°F (6hour)
MMQ-A045	Greater than 85°C / 185°F (1hour)
	Greater than 65°C / 149°F (6hour)

## Replacing and Purchasing Consumable Parts

The gasket and cap are consumable parts. Check once a year for damage/deterioration. If heavily stained or loose, replace them.

For replacements, contact the shop where you purchased this product.

## Inquiries

The utmost measures have been taken to ensure the quality of this product. Should the product be defective, however, contact your dealer and provide the following information.

1. Product name
2. Model Number
3. Description of trouble  
(As detailed as possible)

Feel free to send any questions or comments about this product to the shop where you purchased it.

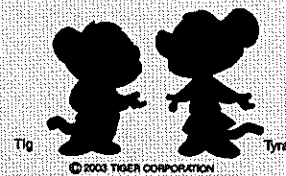

MODEL  
**MMQ-A**

## Stainless Steel Mug

### Instructions

Thank you for purchasing a "TIGER"  
Stainless Steel Mug.  
Please read the instructions completely  
before use.  
Keep these instructions for future  
reference.
